

UNITED GLYCOL BRAKE FLUID DOT 4

Product Description

United Glycol Brake Fluid DOT 4 is engineered for all disc and drum type brake systems which call for DOT 4 or DOT 3 performance. It is formulated using a high quality glycol and glycol ether fluid. United Glycol Brake Fluid DOT 4 is formulated to tolerate extreme temperature conditions, which greatly reduces the tendency to vaporize at elevated temperatures, a common phenomenon in modern braking systems. This increased boiling resistance provides an extra margin of safety over conventional brake fluids.

This product is a highly stable product and maintains its superior protective qualities over long service and extreme conditions. This fluid functions consistently, whether the vehicle is operating in bitter, arctic cold or extreme desert heat. In addition, this product exhibits excellent lubricity and corrosion control and is safe for all materials used in vehicle braking systems.

Applications / Benefits

- * Safe to mix with conventional brake fluids
- * All season protection
- * High and low viscosity control
- * Compatible with rubber components

Typical Characteristics

Test Description	Method	Unit	
Equilibrium Reflux Boiling Point	FMVSS-116	-	270
Wet E.R. Boiling Point	FMVSS-116	-	165
Kinematic Viscosity @ 40°C	ASTM D 445	cSt	1150
Kinematic Viscosity @ 100°C	ASTM D 445	cSt	2
Effect on brake cups @ 70°C	FMVSS-116	-	NIL
Effect on rubber @ 120°C	FMVSS-116	-	NIL
Specific Gravity @ 15°C	ASTM D 4052	-	1.109
Color	-	-	Neutral
